SPECIAL NOTICE

WE make a specialty of supplying Market Gardeners with the best strains of seeds that can be produced. We are always on the alert for a better strain, and if we find it we spare no expense in securing seed stock of it.

We handle absolutely nothing that we do not believe to be the best obtainable. We do not claim to compete in prices with irresponsible parties, whose sole effort is to secure the lowest priced seeds, regardless of quality; such seeds are not cheap, but dear at any price. The first cost of seeds is insignificant, compared with time and labor that must be expended upon a growing crop. Quality is our first consideration, and the prices we offer are as low as first-class seeds can be sold for. All goods will be delivered at freight depots or express offices in Philadelphia, free of charge, but we do not pay the charges of transportation. If seeds are ordered by mail, postage must be added to these prices at the rate of 8 cents per pound and 15 cents per quart. Remittances should be made by Postal Money Order, Express Co.'s Money Order or by Registered Letter. Parties buying large quantities of any one variety will be quoted special prices on application.

TERMS OF GUARANTEE : - The seeds offered in this catalogue have been carefully grown, selected, cleaned and tested for germination, and we believe them to be first class in every respect, but we cannot guarantee the crop as too many conditions enter into it, therefore we give no warranty, express or implied, as to description, purity, productiveness, or any other matter of any seeds we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are to be returned at once, and if the money has been paid for them it will be refunded.

Improved Salamander.—One of the most popular and best all-season heading sorts. The leaves are thin, tender and buttery. The quality is all that could be desired. Heads medium to large size and quite firm. One of the best to use throughout the season. Our strain of this popular variety is unsurpassed. King of the Garden.—If you are looking for something strictly fancy in a large head lettuce, this is it. The heads are extra large and quite firm, leaves thin and of the finest quality. It is too tender to stand rough handling. It is only good for spring and fall, as it will not stand extreme hot weather. Does its best when transplanted from the frames to outside in the spring. Does remarkably well for a late crop in the frames, providing the sash are taken off about the time it begins to form a head, and has plenty of room. Should be planted 15x15. May King.—A large, light green, very early heading sort, which does exceedingly well either for an early outdoor crop or for forcing under glass. Oz. 15c., $\frac{1}{4}$ lb. 40c., lb. \$1.25, 10 lbs. \$11.50.

Simon's Cabbage Head.—This is one of the finest varieties of lettuce ever offered, and is superior to Big Boston in many ways. It does not scald in the heart and does not turn red from cold. It is just as large and as firm as Big Boston and is a little lighter in color. It will hold up better and is an excellent shipping sort. Some market gardeners grow it throughout the season, but we especially recommend it for spring and fall use. If you have been using Big Boston, try this, for it will surely please you. For illustration, see back cover. Oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.50, 10 lbs. \$22.50.

LETTUCE—Continued

Simon's Hot Weather Lettuce

Simon's Hot Weather.—We have found this to be absolutely the best firm heading lettuce to grow through the summer months. It will not scald or burn and will make a head when other varieties fail. It somewhat resembles Salamander in character of leaf, color and size, but the head is more compact and it will stand longer before bolting to seed. It is practically all head, having very few outer leaves. It heads up quickly, making it valuable for an early crop. After repeated trials we have found it to be the best smooth leaved, firm heading, all season va-

riety. We could print hundreds of testimonials if space would permit. Oz. 15c., $\frac{1}{4}$ lb. 50c., lb. \$1.50, 10 lbs. \$14.00.

The following is part of a letter from one of our customers dated Irvington, N. J., September 6, 1909: "We are sending you to-day by express, six heads of Hot Weather Lettuce. We had Big Boston and Salamander in the same field, but found this variety to make heads quicker and harder than the others. We are much pleased with it and will recommend it to others."

TOMATO

Simon's Columbia

Livingston's Globe

Nearly all of our tomato seed is grown in New Jersey especially for seed, and can be depended on to be the best of its class. We do not handle seed saved by canning factories which can be bought for one-third of what ours costs to produce.

Simon's Columbia.—We pronounce this the best main crop red sort. It is the same season as Stone, fully one-third larger, just as smooth and solid. It is nearly solid flesh, having very few seeds, is of a good red color and ripens up to the stem. It is a wonderful cropper, out-yielding Stone. Anyone wanting a strictly large, fancy red tomato will get it by planting this sort. Oz. 40c., $\frac{1}{4}$ lb. \$1.25, lb. \$4.00.

King of the Earlies.—An extra-early, medium-sized, red sort; very prolific and quite smooth. Oz. 25c., $\frac{1}{4}$ lb. 85c., lb. \$3.00, 5 lbs. \$13.75.

Livingston's Globe.—A new large, purple-fruited sort of excellent quality. Fruits rather uneven in size but very smooth and mature earlier than most main-crop sorts. The average tomato is very deep, almost globe-shaped and very solid. It is one of the leading varieties grown throughout Florida to ship North. Our stock of this important variety is of excellent quality. Oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.50, 5 lbs. \$11.25.

Livingston's Coreless.—This might be called a Red Globe, as it is practically the same shape as Livingston's Globe. The fruits are smaller in size and most of them have no core. Oz. 25c., $\frac{1}{4}$ lb. 85c., lb. \$3.00, 5 lbs. \$13.75.

TOMATO—Continued

Tomato Extra Early Mascot

Exceedingly Prolific, Extremely Early, Smooth, Solid, Good Shape and Large Size for an extra early variety are the features of this valuable acquisition

Extra Early Mascot.—We pronounce this new tomato the best extra early we have seen. It is a cross between Earliana and King of the Earlies. Compared with Earliana it is five days earlier, a heavier cropper, fruits fully as large but thicker through from stem to blossom end, more solid and of a deeper red color. It ripens close up to the stem. In habit it resembles Earliana, being quite dwarf with little foliage, but is more compact. It is the greatest yielder we have ever seen. We have counted fifteen marketable fruits on a single crown setting. We do not mean to say that half the patch will do this, but we can honestly say that we saw a great many plants with seven, eight and nine fruits on a crown setting. Being a small-vined sort, it requires high cultivation to bring out all its good qualities. Oz. 40c., $\frac{1}{4}$ lb. \$1.25, lb. \$4.00, 5 lbs. \$18.75.

Chalk's Early Jewel.—For a crop to come in between Earliana and Stone there is none to compare with this if you get the original stock. The fruits are of a bright scarlet color, ripening close up to the stem, are smooth and very solid. They hold up in size longer than most sorts, and for that fact alone it is a very valuable sort. Our seed is grown from the originator's stock, carefully selected, and can be depended on to give the best of satisfaction. Oz. 25c., $\frac{1}{4}$ lb. 85c., lb. \$3.00, 5 lbs. \$13.75.

Chalk's Early Jewel.—Good stock saved from the run of the crop. Oz. 20c., $\frac{1}{4}$ lb. 60c., lb. \$2.25, 5 lbs. \$10.00.

Early Detroit.—An early, medium-sized, smooth, purple-fruited sort, maturing with Acme, but fruits larger, more solid, more globular in shape and superior in every way. Oz. 25c., $\frac{1}{4}$ lb. 85c., lb. \$3.00, 5 lbs. \$13.75.

TOMATO—Continued

Langdon's Earliana

Langdon's Earliana.—We find this strain to be larger, thicker through, more meaty and of a deeper red color than other strains of Earliana. It is equally as early, exceedingly productive and holds its size well throughout the season. The seed we offer was grown in New Jersey by one of our private growers. The crop was inspected by us and we found it excellent. Oz. 40c., $\frac{1}{4}$ lb. \$1.25, lb. \$4.00, 5 lbs. \$18.75.

Spark's Earliana.—One of the best and most popular extra-early sorts. The fruits are good size, red in color, quite smooth and are produced in great profusion. The vine is quite dwarf with little foliage. Our seed is grown from carefully selected stock and can be depended on to give excellent results. Oz. 25c., $\frac{1}{4}$ lb. 85c., lb. \$3.00, 5 lbs. \$13.75.

June Pink, or Pink Earliana.—Similar in all respects to Spark's Earliana, except the fruit is purple instead of scarlet, and the bulk of the crop ripens a little later. One of the best extra-early, purple-fruited sorts. Oz. 25c., $\frac{1}{4}$ lb. 85c., lb. \$3.00, 5 lbs. \$13.75.

Bonny Best.—An early variety maturing between Earliana and Chalk's Early Jewel. Fruits medium size, color bright scarlet, exceedingly smooth, handsome shape, ripens evenly close up to the stem. An excellent sort for growing under glass. It is very prolific and we recommend it as a first-class sort. Oz. 25c., $\frac{1}{4}$ lb. 85c., lb. \$3.00, 5 lbs. \$13.75.

Bonny Best.—Seed saved from Crown Settings only, from selected plants and selected specimens. Oz. \$1.00, 2 oz. \$1.75, $\frac{1}{4}$ lb. \$3.00.

June Pink

TOMATO—Continued

Royal Pink

Royal Pink.—We pronounce this the best main-crop, purple-fruited sort. It matures with Stone. The fruits are very large, exceedingly solid, having but very few seeds, are smooth, ripen close up to the stem and are of a handsome pink color. It is a very heavy yielder. The shape of the fruit is well illustrated in the photograph above, it being quite thick through. The vine is vigorous and seems to resist blight better than most purple-fruited sorts. It is the best long distance shipper, as it will hold up longer than any sort we know of. Extra choice stock grown in New Jersey. Oz. 40c., $\frac{1}{4}$ lb. \$1.25, lb. \$4.00, 5 lbs. \$17.50.

Early Royal Pink.—A decided improvement over Acme, as the fruits are much larger, more solid and it is a much heavier yielder. The vine is more vigorous and the fruits average nearly globe shape. It is fully as early as Acme and we pronounce it the best large, early, purple-fruited sort. Oz. 40c., $\frac{1}{4}$ lb. \$1.25, lb. \$4.00, 5 lbs. \$17.50.

Brinton's Best.—A large, smooth, scarlet-fruited, main-crop sort. Oz. 20c., $\frac{1}{4}$ lb. 60c., lb. \$2.00, 5 lbs. \$8.75.

Cumberland Red.—An old variety formerly quite popular in Cumberland County, New Jersey. Fruits large, red in color, slightly ridgy. Matures late. Oz. 30c., $\frac{1}{4}$ lb. 85c., lb. \$3.00, 5 lbs. \$12.50.

Duke of York.—One of the best late, purple-fruited sorts. Fruits large, very solid, smooth, ripening close to the stem. It is claimed by some to be blight-proof, but we know of no tomato that will not blight under very unfavorable conditions. It is grown extensively throughout Florida to ship North, and is claimed by some of the growers there to be the best for this purpose. Our stock is true and can be depended on. Oz. 20c., $\frac{1}{4}$ lb. 65c., lb. \$2.25, 5 lbs. \$10.00.

Dwarf Stone.—Vine dwarf but vigorous and productive. While maturing with the later sorts the bright red fruit is of good color, exceedingly smooth, very solid and the largest of any of the dwarf varieties. Oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.50, 5 lbs. \$11.25.

Dwarf Champion.—An early purple-fruited variety, forming strong, erect, bushy plants. Fruit medium size, smooth and fairly solid. Grown extensively for plants and makes a handsome sturdy bush. Oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.50, 5 lbs. \$11.25.

Red Rock.—A large, late, red variety. Larger than stone and very solid; almost solid meat. Oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.50, 5 lbs. \$11.75.

Improved Stone.—One of the heaviest and most solid fruited of the large tomatoes of good quality. Our stock is distinctly superior to most that is offered under this name, being larger, smoother, more uniform and better colored. Vine vigorous and productive. Fruit round, slightly flattened, very large and astonishingly heavy. The quality is unexcelled. Oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.50, 5 lbs. \$11.25.

Stone.—A good stock of Stone tomato sold by the majority of seed houses, but it will not compare with our Improved Stone. Oz. 20c., $\frac{1}{4}$ lb. 60c., lb. \$2.00, 5 lbs. \$8.75.

Success.—A bright scarlet, second-early sort, maturing about the same time as Chalk's Early Jewel. Fruits good size, smooth, solid and very prolific. Oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.50, 5 lbs. \$11.25.

TURNIP—Continued

Large White Norfolk.—Usually grown for feeding stock, but although a little coarse in texture it is of very good quality for the table. Roots large, spherical or slightly flattened and very white. It is allowed to stand out during the winter in the South, where the tops are used for greens. Oz. 5c., $\frac{1}{4}$ lb. 15c., lb. 40c., 5 lbs. \$1.75.

Pomeranian White Globe.—One of the most productive kinds, and in good, rich soil roots will frequently grow to twelve pounds in weight. It is globe-shaped, skin white and smooth. Used for stock feeding; also excellent for table use. Oz. 5c., $\frac{1}{4}$ lb. 15c., lb. 40c., 5 lbs. \$1.75.

Golden Ball, or Orange Jelly.—One of the most delicate and sweet yellow-fleshed turnips yet introduced. Not of large size, but firm, hard and most excellent flavor. Keeps well and is a fine table variety. Skin deeper yellow than most of this class. Oz. 5c., $\frac{1}{4}$ lb. 15c., lb. 40c., 5 lbs. \$1.75.

White Egg.—A quick-growing, egg-shaped, smooth, pure white variety with small top and rough leaves. The root grows half out of the ground. Flesh very sweet, firm and mild. Oz. 5c., $\frac{1}{4}$ lb. 15c., lb. 50c., 5 lbs. \$2.25.

Large Amber Globe.—Grows to a large size, skin yellow, with green crown. Flesh yellow. Oz. 5c., $\frac{1}{4}$ lb. 15c., lb. 40c., 5 lbs. \$1.75.

Cow Horn, or Long White.—Clear white except a little shade of green at the top; long, slightly crooked and growing nearly half out of the ground; delicate and well flavored, of very rapid growth, and has obtained considerable favor as a market sort for fall and early winter use. Also grown for stock. Oz. 5c., $\frac{1}{4}$ lb. 15c., lb. 40c., 5 lbs. \$1.75.

Early Snowball.—A quick-growing ball-shaped, pure white sort with short top and free from the bitter taste that the Milan sorts usually possess. Oz. 7c., $\frac{1}{4}$ lb. 15c., lb. 50c., 5 lbs. \$2.25.

Purple Top Yellow Aberdeen.—A medium-sized, round, late-maturing, yellow turnip. Roots yellow with purple crown; flesh pale yellow. It is very hardy, an excellent keeper and is invaluable for stock feeding. Oz. 5c., $\frac{1}{4}$ lb. 15c., lb. 40c., 5 lbs. \$1.75.

Seven Top.—Cultivated extensively in the South for tops, which are used for greens. It is very hardy and will grow all winter, but does not produce a good root and is only recommended for the tops. Oz. 5c., $\frac{1}{4}$ lb. 15c., lb. 40c., 5 lbs. \$1.75.

Southern Prize.—Similar to Seven Top, but the tops are more abundant, while the roots are of considerable size, more symmetrical in shape and better in quality; also used for feeding. A favorite forage plant in the Virginias and Carolinas, where it grows during winter without protection. Oz. 5c., $\frac{1}{4}$ lb. 15c., lb. 40c., 5 lbs. \$1.75.

COW PEAS

Invaluable for plowing under for green manure, or they can be cut green for feeding or can be cured like clover and fed through the winter. We can supply the following varieties at \$3.00 per bushel, including bags; **Black Giant, New Era and Whip-poor-will.**

DWARF ESSEX RAPE

There is no plant that will give as heavy a yield of forage at such a small cost as this, and its general cultivation would add largely to the profits of American farms. Especially valuable for green manuring and pasture. When fed off by sheep it will probably do more to restore and make profitable exhausted soils than any other plant. Biennial.

Ground should be prepared same as for turnips. Sow in June or July with a turnip drill, in rows two and one-half feet apart, at the rate of two and one-half pounds of seed per acre. It may be sown broadcast, either with other fall forage crops or by itself, using from one to five pounds of seed per acre. Lb. 12c., 10 to 25 lbs. 10c., 25 to 100 lbs. 9c.

VETCH

Hairy, or Sand Vetch (*vicia villosa*).—An excellent plant for a winter cover crop to prevent leaching, also for forage and fertilizing. If sown in August or September it will make a good crop of forage the following spring. It is quite hardy and very seldom winter kills in the vicinity of Philadelphia, unless planted on wet, heavy soil. It is being used extensively in this vicinity for plowing under, also for dairy stock and poultry pasture. Sow 1 to 1½ bushels per acre. If sown with rye use ¾ to 1 bushel of Vetch with ½ bushel of rye. Qt. 30c., 4 qts. \$1.10, pk. \$2.00, bus. \$7.25, 100 lbs. \$12.00.

Ranere Red Raspberry

A True Double Cropper.

This variety has been thoroughly tested as a market berry, and sold for the highest market prices in Philadelphia, New York and other markets. The originator, after much persuasion, has consented to sell a limited number of plants. The following description is not overdrawn and we feel confident you will be more than pleased with it, especially if you have grown other varieties of raspberries.

It is the earliest of all red raspberries, beginning to ripen in Central New Jersey from June 15th to 20th, just as the strawberry crop is waning; it is wonderfully prolific, the first or main crop being heavier than that of any red raspberry known; it gives a crop of fruit all summer and autumn, fruiting on the old canes until well into August. By this date berries begin to ripen on the young, i. e., current year's canes, which continue to produce berries in increasing numbers until severe frost. In 1912 the last berries were picked the first of November.

The berries are bright crimson, of large size and of surpassing quality—rich, sugary, with full raspberry flavor; they are exceedingly meaty, firm texture and keep in good condition longer after being gathered than any other raspberry.

RANERE has a remarkable constitution, withstanding the severest winter as well as severe drought; does well on heavy soil or on light sandy soil; is a strong grower, with luxuriant foliage which never suffers from sunburn. The fruit is an excellent shipper, and has been shipped successfully to Boston and other distant markets from Central New Jersey.

If planted early, RANERE will yield ripe fruit in June of the same year. The yield will be correspondingly heavier as the growth increases.

A plot containing less than two acres of RANERE yielded a crop in June, 1912, (the second year of bearing) that netted the grower \$400. The same plot yielded a heavy crop during September and October, which sold for good prices. The writer picked some fine fruit from the same plot on November 2nd. RANERE RED RASPBERRY should be in every garden.

From the PHILA. INQUIRER, Oct., 1912

HAMMONTON.—Twenty-four crates, or nearly 1500 boxes, of second crop raspberries were shipped from here Monday. A new variety of raspberry, bearing an early and late crop, promises to add greatly to the berry raising industry, as over half a million plants have been put out this season.

From the PHILA. RECORD, Nov., 1912

A double-cropping raspberry has been originated by an Italian small fruit grower of Hammonton, N. J. It produces berries on the tips of the new shoots of the seasons growth from the last of August until frost, and on the laterals of the same shoots the following year in June. The berry is crimson, without any purple shade, and of large size, both in June and autumn. It has a good flavor, is firm, and consequently a good shipper.
